

As HMI continues to launch exciting new product offerings, we are making room for our expansion by discontinuing certain products.

Please see the following updates, effective as of January 27, 2022.

FINISHES:

GOLD & ROMAN BRONZE - discontinued across all HMI product lines, with the exception of our Heavy Glass Hardware. (Skyline and TruFit in Roman Bronze are still available.)

CRAFTSMAN line - discontinued in its entirety.

S-Curved Doors - discontinued.

HMI Classic (Formally known as Cardinal Series), Traditional Euro, and Euro Series Bypass units will be discontinued and replaced with the upgraded Platinum units.

All NEO Bypass Units - discontinued.

All mirror frame and related mirror frame parts will be discontinued.

ProHMI line has been condensed. Moving forward, we will only stock various finish J-Bar, Flat Bar and Vinyl Trims. However, ProHMI products as referenced in the current price list will be available while supplies last.

Please Note This Change: All semi-frameless swing doors moving forward will be upgraded to ¼" door glass with a C pull handle and clear bottom sweep (select sizes). This will eliminate several 3/16" glass sizes that accommodate compression fit hardware.

Various extrusions within the shower division will be discontinued.

NOTE: Contact your HMI Technical Design Team Member for further information.

10MM stock door offerings will only be available in our most popular 28" and 30" widths and offered at popular overall heights.

NOTE: HMI will continue selling discontinued products while supplies last.
