

CHAMPAGNE BRONZE FINISH DISCLAIMER

HMI's Champagne Bronze finish has an elegant durable gold appearance. Due to the finishing process along with different material substrates, some color and tone variation may occur within the product line. As such, HMI cannot warrant an exact color match between different part types. HMI's Champagne Bronze is not intended to be an exact color match to finishes from leading fixture manufacturers, and care should be taken when selecting coordinating products. With proper cleaning practices and avoiding harsh or abrasive cleaners, the finish will resist discoloration.
